WellPally

WellPally's Pour On solution offers long-lasting, all-around protection for you and your furbabies!

Hyperpolarizing Formula-Eliminates Bugs and Parasites Completely

Longer Flea Control with Just 1 Use

Easy Application No Measuring, Biting, or Injection!

WARNING: For external use only. Do not feed to pets or inject directly into the bloodstream.

When your pet comes back from playing outside, they may carry thousands of tiny fleas and other nasty parasites on their back. This can lead to weeks of itching, biting, and severe skin disease for your precious pet!

WellPally's Avermectin offers a simple, yet effective solution-Just rub a few drops of this all-in-one solution directly on your pet's skin to eliminate these nasties completely. It's a convenient alternative to capsules that any pet will love-especially grumpy dogs, nervous cats, and pets prone to skin disease.

Active Ingredient: Avermectin B1

0.5ml/pipette x 3 pipettes/box

Weight (kg)	Application area	Dosage (ml)
< 5kg	Neck	0.5
5-15kg	Neck & Back	1
15-30kg	Neck & Back & Armpit	2
> 30kg	Neck & Back & Armpit & Groin	3

Directions Open the applicator, then release the contents directly on your pet's skin.

WARNING This product may become very toxic if digested. Do not allow your pet to ingest it. Consult your veterinarian on the safe use of this product.
